The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 14, 15, 17, and 19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Valarik in view of Battis et al. (Battis). Valarik discloses the claimed device with the exception of the "pre-arranged orientation". However, as disclosed by Battis it is known in the art to pre-arrange such elements 18 in the form of "bands" as applicant's elements 18 are defined in claim 17. It would have been obvious to one of ordinary skill in the art to have pre-arranged Valarik's elements as well in such a fashion if such an orientation was preferred by the stick handler to control a puck or ball.

Applicant's arguments with respect to claims 14, 15, 17, and 19 have been considered but are moot in view of the new ground(s) of rejection.
